

### *Don't get stuck in a rut this winter!*

Wet weather combined with cold winds can cause issues on any construction site. Getting vehicles stuck on muddy access roads can become a costly nightmare for customers. Using **Tenax Geogrids** combined with **Ekotex Geotextiles** can stop these issues through reinforcing the access route.

### **Tenax Geogrids**

Tenax are a recognised world leader in the production and design of geogrids for stabilisation and reinforcement of soils.

- Tried and tested around the world in reinforcement applications
- CE certified under reinforcement
- Products to suit a variety of soil types

### **Ekotex Geotextiles**

The Ekotex range is a thermally bonded and needle-punched Geotextile, giving the fabric outstanding performance for separation.

- Industry standard nonwoven Geotextile
- Ekotex rolls ranging from 100g/m<sup>2</sup> to 300g/m<sup>2</sup>
- For more information on **Ekotex** or **Tenax** please contact us

#### **QUALITY ASSURANCE**

Products are manufactured under quality assured schemes.
