

WorkLite® Illumination for all Work Sites

WorkLite® worksite lights are suitable for construction sites of all sizes. Due to the reliable and cost effective LED technology used, WorkLite® can withstand varying working conditions, vibrations and impacts.

WorkLite® can illuminate even the most challenging worksite because its light is directed precisely where it is needed, without wasting a single ray of light. WorkLite® uses COB LEDs as its light source (12-25W) and produces light of up to 166lm/W, compared with basic fluorescent lamps which produce light of only 50lm/W. The light output of these LEDs is of top quality compared to the energy consumed.

Due to the protective voltage, all the installation work and group changes can be made by a construction worker, without the need of an electrician.

From a single 3KVA site transformer, up to 50 WorkLite® units can be chained together without any loss of lighting.

Why WorkLite®?

- Long-lasting, maintenance free LED light
- Saves 70% of energy costs compared to fluorescent tubes
- Easy to store, can be stacked
- Fast installation
- Immediately lights up clearly
- Corporate branding available
- Easy and inexpensive to use
- Reposition without switching off lighting chain

WorkLite® 110V	
Power	12W - 25W
Light Output	2,000 - 3,600 lm
Connection Device	Constant current
Power Factor	0.98
Operating Voltage	40 - 50V or 110 - 230V
Operating Temperature Range	-40°C to 50°C
Colour Temperature	5,000 K
Colour Rendering	>80 Ra
Light Production	70% after 50,000h of operation
Protection Class	IP54
Weight	1.2 - 2.5 Kg

Structure

Support hook: 5mm stainless steel rod

Handle part: Shock and fire resistant ABS / PC plastic with a thick wall

Frame: Powder coated extra strong unbreakable aluminium casting

Reflective dome: UV protected, thick walled polyethylene

Impact resistant Mennekes plug point

Frost resistant Drakaflex connecting line

WorkLite® site illumination units are available from Inform UK Ltd now!
