

ECO-FRIENDLY CONSTRUCTION CHEMICALS

Safelease

A formwork release agent using the latest soluble polymer technology to produce an environmentally friendly and highly efficient release material for concrete formwork on site.

Coverage 20-30m² per litre

Code	Item	Size Ltr
SL25	Safelease	25
SL210	Safelease	210

Safecure Standard & Super

A water based spray on temporary membrane to retain moisture in freshly placed concrete. Degrades when exposed to ultra-violet light over a period of time. Supplied as Standard grade (medium curing efficiency) or Super grade (High curing efficiency).

Coverage 5.5 m² per litre

Code	Item	Size Ltr
SCSD25	Standard	25
SCSD210	Standard	210
SCS25	Super	25
SCS210	Super	210

Safecure WW & WT

A water based curing compound comprising of an Aqueous silicate solution that reacts to deposit an integral layer of high strength crystals into the pore structure of the concrete. Also available with a tinted fugitive dye to assist in the identification during application

Code	Item	Size Ltr
SCWW25	Standard	25
SCWW210	Standard	210
SCWT25	Tinted	25
SCWT210	Tinted	210

Safetard Gel

A transparent water based gel type concrete retarder with a colour tint to assist application. Ideally suited for the production of exposed aggregate finishes or 'keyed' surfaces for construction joint.

Coverage 3-5m² per litre

Code	Item	Size Ltr
STG25	Gel	25

Safetard Liquid

A water based spray applied liquid that retards the setting of the top surface of freshly placed concrete. The surface laitance can be brush/washed away the following day to produce an exposed aggregate finish.

Coverage 5m² per litre

Code	Item	Size Ltr
STL25	Liquid	25
STL25	Liquid	210

Sprayers

A full range of high performance sprayers for construction chemicals. Suitable for use with mould oils, release agents and curing membranes. We recommend that all sprayers are cleaned through after use with Cleaning Fluid (RCF25)

Code	Item	Size
MS11	Metal Spray	11 Litre
PS10	Plastic Sprayer	10 Litre
KSS15	Knapsack Sprayer	15 Litre
RCF25	Cleaning Fluid	25 Litre

COLUMN FORMWORK

Cardboard Disposable

An economical, single use spiral wound, cardboard column former. Manufactured to a high standard and complete with a PVC liner, to give a smooth finish to concrete surfaces. Supplied with a built-in rip cord for ease of stripping. Columns are made to order and can be supplied in any required height up to the maximum recommended. Used mainly for in-situ concrete pour application. Full brochure upon request.

Code	Internal Diameter mm	Wall Thickness mm	Weight per metre kg	Max. Recom. Height of Continuous Pour metre
CF200	200	5.0	2.09	12
CF250	250	5.0	2.59	12
CF300	300	5.0	3.11	10
CF350	350	5.0	3.68	10
CF400	400	6.0	4.99	9
CF450	450	6.0	5.67	8
CF500	500	7.0	7.36	8
CF550	550	7.0	8.04	8
CF600	600	7.5	9.51	8
CF635	635	7.5	9.94	7

Plastic Disposable

A disposable single use, fully waterproof column shutter providing a smooth concrete finish. The column shutter can be manufactured in virtually any diameter from 200-1200mm. The columns can be stored openly on site without any detrimental effect.

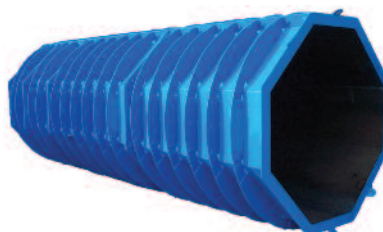

Code	Item
PCF	Plastic Column Shutter

Available 200mm – 1200mm diameter

Steel Re-usable

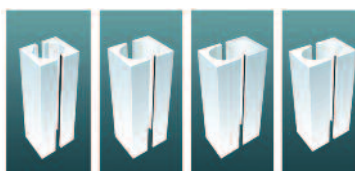

For re-use applications, column shutters can be manufactured to order from Steel. Supplied with propping points and grout check seals. Prices on application.

Code	Item
SCF	Steel Column Shutter

Polystyrene Re-usable

Manufactured from high density polystyrene with a proplex liner to give a smooth finish. Can be re-used up to four times. Further information and prices on application

Code	Item
PCS	Polystyrene Column Shutter
