

JOINT SEALANT ACCESSORIES

Barrel Gun

Used for the easy and controlled application of joint sealants in both horizontal and vertical plains. Will accept Gun grade material and polyurethane sausages. Supplied complete with applicator nozzles.

Code	Item	Size CC
BG60	Barrel Gun	600

Mixing Paddle

A mixing paddle for use with all two part joint sealant. The paddle ensures that the sealant components are correctly mixed together ensuring the correct consistency and two part reactions required to cure.

Code	Item	Unit
PAD	Mixing Paddle	Each

Follower Plate

A metal Follower Plate used to aid the extraction of sealant from the tins into the Barrel Gun. After the sealant has been mixed using the paddle, the Follower Plate is placed on top of the sealant in the tin and the Barrel Gun on top of the plate. By pushing down on the plate the sealant is forced to the gun.

Code	Item	Unit
FP	Follower Plate	Each

Turks Head Brush

A coarse bristled brush that is ideal for helping in the application of Hot Poured Sealants. Can also be used for the application of Liquid membranes. Available with a short or long handle.

Code	Item	Unit
THBS	Brush Short	Each
THBL	Brush Long	Each

Tool Cleaner

A solvent based cleaner for the removal of sealant from tools used. It should be especially used for cleaning out Barrel Guns in order to keep them operating correctly.

Code	Item	Size CC
TLC5	Tool Cleaner	5 Litre
