

## WATERSTOPS - PVC

### PVC Waterstop – Internal

Flat Dumbbell and Centrebulb Internal Waterstops have been specifically developed, with their unique rib and end bulb profiles to provide a totally effective water barrier when cast centrally within concrete wall and floor joints.

*Flat Dumbbell*

*Centrebulb*

Code	Item	Size mm	Roll Size Metre
DB150	Dumbbell Construction	150	15.0
DB200	Dumbbell Construction	200	15.0
DB250	Dumbbell Construction	250	12.0
CB150	Centrebulb Expansion	150	15.0
CB200	Centrebulb Expansion	200	15.0
CB250	Centrebulb Expansion	250	12.0

### PVC Waterstop – External

Extaseal External PVC Waterstop is a high performance, heavy duty profile waterstop specifically developed to seal joints in concrete structures at the external surface thus protecting the reinforcing steel against corrosion attack, in addition to providing a totally watertight seal.

**Note:** A full range of pre-fabricated junctions to suit all PVC Waterstops are available.

*Extaseal Construction Type*

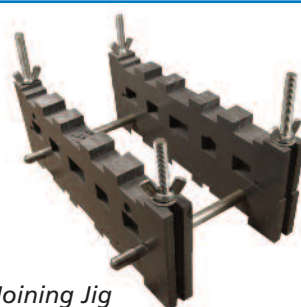

*Extaseal Expansion Type*

Code	Item	Size mm	Roll Size Metre
ES200C	Extaseal Construction	200	15.0
ES250C	Extaseal Construction	250	12.0
ES200E	Extaseal Expansion	200	15.0
ES250E	Extaseal Expansion	250	12.0

### Waterstop Jig

Used for joining PVC waterstops. Jigs available for each profile.

*Joining Jig*

Code	Item	Unit
WJ	Waterbar Jig	Each

### Hot Knife

110v Hot knife for use on site when welding the PVC waterstop together.

*Electric Joining Knife*

Code	Item	Unit
HK	Hot Knife	Each
